KARUS MINING INC.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

1. NATURE OF OPERATIONS AND GOING CONCERN

Karus Mining Inc. (“Karus” or the “Company”) was incorporated under the *Business Corporations Act* (British Columbia) (“BCBCA”) on November 20, 2020, under the name 1275702 B.C. Ltd and subsequently changed its name to Karus Gold Corp. on December 11, 2020, and to Karus Mining Inc. on February 14, 2024. The Company was incorporated as the target company for certain assets and liabilities spun out from KORE Mining Ltd. (“KORE”). On January 25, 2021, KORE completed a Plan of Arrangement pursuant to which KORE transferred to the Company all of KORE’s Canadian exploration properties, which included the FG Gold and Gold Creek projects in the South Cariboo property and related equipment and exploration deposits, in exchange for 53,112,455 shares of the Company, which were distributed to KORE shareholders on the basis of one common share of the Company for every two KORE shares held.

On February 14, 2024, in anticipation of the acquisition of Theia Gold Corp. (“Theia”), Karus completed a consolidation of its outstanding common shares on the basis of one new consolidated share for every 10 outstanding shares, and concurrently changed its name from “Karus Gold Corp.” to “Karus Mining Inc.”. On March 13, 2024, the Company closed on an amalgamation agreement (the “Amalgamation Agreement”) to acquire 100% of the issued and outstanding common shares (the “Theia Shares”) of Theia, a private British Columbia incorporated company, by way of a reverse takeover transaction (the “Theia Transaction”). Theia is an exploration stage entity with its main property being the Mineral Creek gold project in British Columbia.

Pursuant to the terms of the Amalgamation Agreement, the Theia Transaction was completed by way of a three-cornered amalgamation under the provisions of the British Columbia Business Corporation Act (“BCBCA”) whereby 1452146 B.C. Ltd. (“Subco”), a wholly-owned subsidiary of Karus, incorporated in December 2023, amalgamated with Theia, and each of the Theia Shares, following the amalgamation, were exchanged for 2.5414 post-consolidated common shares of Karus. Following completion of the Amalgamation Agreement, Theia became a wholly-owned subsidiary of Karus, and the existing shareholders of Karus held approximately 30% in the capital of the Company while the former shareholders of Theia held approximately 70%.

Since the transaction resulted in the shareholders of Theia obtaining control of Karus, the Theia Transaction constituted a reverse acquisition for accounting purposes with Theia identified as the accounting acquirer. The net assets of Karus on the date of the reverse acquisition were deemed to have been acquired by Theia. These consolidated financial statements include the results of operations of Karus from March 14, 2024. The comparative amounts presented are those of Theia, prior to the reverse acquisition.

The Company’s registered office is located at 1100 – 1111 Melville Street, Vancouver, BC V6E 3V6.

These condensed interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period.

As at March 31, 2026, the Company had an accumulated deficit of \$11,055,607 (December 31, 2025 - \$10,626,918) and working capital of \$6,458,095 (December 31, 2025 - deficiency of \$291,096). For the three months ended March 31, 2026, the Company had no revenues and had a loss and comprehensive loss of \$236,056.

The Company’s ability to continue to operate and to carry out its planned exploration activities for the next twelve months is uncertain and dependent upon the continued financial support of its shareholders and on securing additional debt or equity financing. There is no assurance that any such initiatives will be successful or sufficient and, as a result, this gives rise to a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. These condensed interim consolidated financial statements have been prepared with the assumption that the Company

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation.

The continuing operations of the Company are dependent upon obtaining necessary financing to meet the Company's commitments as they come due and to finance future exploration and development of potential business acquisitions, economically recoverable reserves, securing and maintaining title and beneficial interest in the properties and upon future profitable production. Failure to continue as a going concern would require that assets and liabilities be recorded at their liquidation values, which might differ significantly from their carrying values.

2. BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Therefore, these financial statements comply with International Accounting Standard ("IAS") 34 "Interim Financial Reporting". The accounting policies adopted are consistent with those of the previous financial year.

These condensed interim consolidated financial statements have been authorized for issue by the Board of Directors of the Company on June 25, 2026.

These financial statements include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2025. In preparing these financial statements, the Company applied the same significant judgments in applying its accounting policies and is exposed to the same sources of estimation uncertainty as disclosed in its annual financial statements.

Principles of Consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its subsidiaries as at March 31, 2026. Where the Company has the power, either directly or indirectly, to govern the financial and operating policies of another entity or business so as to obtain benefits from its activities, it is classified as a subsidiary. The consolidated financial statements present the results of the Company and its subsidiaries as if they formed a single entity. All inter-company transactions and balances between the companies are therefore eliminated in full.

The condensed interim consolidated financial statements comprise the financial statements of the Company and its wholly-owned subsidiary, Theia Gold Corp.

Basis of Measurement

These condensed interim condensed interim consolidated financial statements have been prepared on a historical cost basis. The statements are presented in Canadian dollars unless otherwise noted.

3. MATERIAL ACCOUNTING POLICY INFORMATION**Cash and cash equivalents**

Cash includes cash on hand, and deposits held at call with financial institutions. Cash equivalents include highly liquid investments with original maturities of three months or less, and which are subject to an insignificant risk of change in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

Financial Instruments**i) Financial assets**

All financial assets are measured at fair value on initial recognition. Measurement in subsequent periods depends on the financial assets' classification, as described below:

Fair value through profit or loss ("FVTPL"): Financial instruments designated at FVTPL are initially recognized and subsequently measured at fair value with changes in those fair values charged immediately to net earnings.

Amortized cost: Financial instruments designated at amortized cost are initially recognized at fair value, net of directly attributable transaction costs, and are subsequently measured at amortized cost using the effective interest method. Financial instruments under this classification include cash, accounts receivable, and reclamation bond.

Fair value through other comprehensive income ("FVOCI"): Financial instruments designated at FVOCI are initially recognized at fair value, net of directly attributable transaction costs, and are subsequently measured at fair value with changes in fair value recognized in other comprehensive income, net of tax.

ii) Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or amortized cost. Financial liabilities classified at amortized cost are initially recognized at fair value less directly attributable transaction costs. The Company's accounts payable, accrued liabilities and loan payable are classified at amortized cost. The Company does not currently have any FVTPL financial liabilities.

iii) Impairment of financial assets

An entity is required to recognize expected credit losses on financial assets carried at amortized cost, when financial instruments are initially recognized and to update the amount of expected credit losses recognized at each reporting date to reflect changes in the credit risk of the financial instruments.

Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods, if the amount of the loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized.

Foreign exchange

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currency for all entities within the Company is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in International Accounting Standard ("IAS") 21, The Effects of Changes in Foreign Exchange Rates.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, the monetary assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the consolidated statement of financial position date while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are reflected in profit or loss for the period.

Exploration and Evaluation Assets*Pre-acquisition Costs*

Pre-acquisition costs are expensed in the period in which they are incurred.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

Exploration and evaluation costs for mineral properties

Once the legal right to explore a property has been acquired, costs directly related to exploration and evaluation expenditures (“E&E”) are recognized and capitalized, in addition to the acquisition costs. These direct expenditures include such costs as materials used, surveying costs, drilling costs, payments made to contractors and depreciation on plant and equipment during the exploration phase. Costs not directly attributable to exploration and evaluation activities, including general administrative overhead costs, are expensed in the period in which they occur.

The Company may occasionally enter into farm-out arrangements, whereby the Company will transfer part of a mineral interest, as consideration, for an agreement by the farmee to meet certain exploration and evaluation expenditures which would have otherwise been undertaken by the Company. The Company does not record any expenditures made by the farmee on its behalf. Any cash consideration received from the agreement is credited against the costs previously capitalized to the mineral interest given up by the Company, with any excess cash accounted for as a gain on disposal.

When a project is deemed to no longer have commercially viable prospects to the Company, exploration and evaluation expenditures in respect of that project are deemed to be impaired. As a result, those exploration and evaluation expenditure costs, in excess of estimated recoveries, are written off to the consolidated statement of loss and comprehensive loss.

On an annual basis, the Company assesses exploration and evaluation assets for impairment when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount.

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the property is considered to be a mine under development and is classified as ‘mines under construction’. Exploration and evaluation assets are also tested for impairment before the assets are transferred to development properties.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction to capitalized exploration costs. Mineral exploration and evaluation expenditures are classified as intangible assets.

Share Capital

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity.

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component. The Company considers the fair value of common shares issued in a private placement to be the more easily measurable component and the common shares are valued at their fair value. The balance, if any, is allocated to the attached warrants. Any fair value attributed to the warrants is recorded to reserves.

Basic and Diluted Earnings (Loss) Per Share

The Company presents basic and diluted earnings (loss) per share data for its common shares, calculated by dividing the earnings (loss) attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. The dilutive effect on earnings per share is calculated presuming the exercise of outstanding options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to repurchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options and warrants that would be anti-dilutive.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

Income Taxes

Income tax comprises current and deferred tax. Income tax is recognized in the consolidated statement of income (loss) and comprehensive income (loss) except to the extent that it relates to items recognized directly in equity or other comprehensive income (loss), in which case the income tax is also recognized directly in equity or other comprehensive income (loss).

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to set off the amounts, and the Company intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is recognized in respect of all qualifying temporary differences arising between the tax basis of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the statement of financial position date and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Deferred income tax assets and liabilities are presented as non-current.

Share-Based Payments

Equity-settled share-based payments for directors, officers and employees are measured at fair value at the date of grant and recorded as compensation expense in the consolidated financial statements. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a graded vesting basis over the vesting period based on the Company's estimate of shares that will eventually vest.

Compensation expense on stock options granted to non-employees is measured at the earlier of the completion of performance and the date the options are vested using the fair value method and is recorded as an expense in the same period as if the Company had paid cash for the goods or services received. When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a Black-Scholes Model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations.

Any consideration paid by directors, officers, employees and non-employees on exercise of equity-settled share-based payments is credited to share capital. Shares are issued from treasury upon the exercise of equity-settled share-based instruments.

Rehabilitation Provision

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of tangible long-lived assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates is capitalized to the amount of the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as the related asset.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related asset with a corresponding entry to the rehabilitation provision.

The Company's estimates are reviewed annually for changes in regulatory requirements, effects of inflation and changes in estimates. Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to the consolidated statement of income (loss) and comprehensive income (loss) for the year.

As at March 31, 2026 and December 31, 2025, the Company has no known obligations relating to rehabilitation.

Flow-Through Shares

The Company may, from time to time, issue flow-through common shares to finance a portion of its exploration programs. Pursuant to the terms of flow-through share agreements, the tax deductibility of qualifying resource expenditures is transferred to investors. On issuance, the Company bifurcates the flow-through share into i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability, and ii) share capital. Upon expenditures being incurred, the Company derecognizes the liability. The premium is recognized as other income on settlement of flow-through share premium liability.

Proceeds received from the issuance of flow-through shares or units are restricted to be used only for Canadian resource property exploration expenditures within a two-year period. The Company may also be subject to Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations.

Convertible debentures

The host debt liability, equity conversion feature and other (when applicable) components of convertible debentures are presented separately on the consolidated statement of financial position, starting from initial recognition. The Company determines the carrying amount of the financial liability by discounting the stream of future payments at the prevailing market rate for a similar liability of comparable credit status and providing substantially the same cash flows. The liability component is then increased by accretion of the discounted amounts to reach the face value of the convertible notes at maturity which is recorded in profit or loss as accretion expense.

The carrying amount of other components (when applicable), such as warrants, is determined using the Black-Scholes option pricing model. The carrying amount of the equity component is calculated by deducting the carrying amount of the financial liability and the carrying amounts of any other components (when applicable) from the amount of the convertible debentures, and is presented in equity as an equity component of convertible debentures. The equity component is not remeasured subsequent to initial recognition, except on conversion or expiry.

The transaction costs are allocated between liability, equity and other (when applicable) components, on a pro-rata basis according to their carrying amounts

Impairment of Long-lived Assets

The Company's long-lived assets are reviewed for an indication of impairment at each statement of financial position date. If an indication of impairment exists, the asset's recoverable amount is estimated.

An impairment loss is recognized when the carrying amount of an asset, or its cash-generating unit, exceeds its recoverable amount. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Impairment losses are recognized in the consolidated statement of loss and comprehensive loss for the year. Impairment losses recognized in respect of cash-generating units

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

are allocated first to reduce the carrying amount of any goodwill allocated to cash-generating units and then to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

The recoverable amount is the greater of the asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Adoption of New Accounting Standards and New Accounting Pronouncements

A number of new standards, and amendments to standards and interpretations, are not effective and have not been early adopted in preparing these consolidated financial statements. The following accounting standards and amendments are effective for future periods:

IFRS 18 – Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18 Presentation and Disclosure in Financial Statements. This standard aims to improve the consistency and clarity of financial statement presentation and disclosures by providing updated guidance on the structure and content of financial statements. Key changes include enhanced requirements for the presentation of financial performance, financial position, and cash flows, as well as additional disclosures to improve transparency and comparability. IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. The Company is currently assessing the impact that the adoption of IFRS 18 will have on its consolidated financial statements.

IFRS 7 & IFRS 9 – Financial Instruments

In May 2024, the IASB issued amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments – Disclosures. The amendments clarify the derecognition of financial liabilities and introduce an accounting policy option to derecognize financial liabilities that are settled through an electronic payment system. The amendments also clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features and the treatment of non-recourse assets and contractually linked instruments (CLIs). Further, the amendments mandate additional disclosures in IFRS 7 for financial instruments with contingent features and equity instruments classified at FVOCI. The amendments are effective for annual periods starting on or after January 1, 2026 and had no significant effect on its consolidated financial statements.

(Expressed in Canadian dollars unless otherwise stated)

4. CRITICAL ESTIMATES AND JUDGMENTS

The Company makes certain estimates and judgments about the future that affect the reported amounts of assets and liabilities. Estimates and judgments assumptions are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and judgments.

Information about critical estimates and judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the consolidated financial statements within the next financial year are discussed below:

Recoverability of Capitalized Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company and the maintenance of good standing of the mineral titles, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after the expenditures are capitalized, information becomes available suggesting that the recovery of the expenditures is unlikely, the amount capitalized is written off in the profit or loss in the year the new information becomes available.

Valuation of Share-Based Payments

Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the stock options granted. This estimate also requires determining the most appropriate inputs to the valuation model including the expected lives of the stock options, volatility, interest rates and dividend yield and making assumptions about them. The model and assumptions used for estimating the fair value of share-based payment transactions are disclosed in Note 7.

Recovery of Deferred Tax Assets

Judgment is required in determining whether deferred tax assets are recognized in the statement of financial position. Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the date of the statement of financial position could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future periods. The Company has not recorded any deferred tax assets.

Going Concern

As at March 31, 2026, the Company had not advanced its mineral properties to commercial production. The Company's continuation as a going concern is dependent not only upon successful results from exploration activities on its mineral properties but also its ability to raise capital and attain profitable operations. In the foreseeable future, the Company will have to rely on the issuance of shares or the exercise of options and warrants or the issuance of debt securities to fund ongoing operations. The ability of the Company to raise capital will depend on market conditions; it may not be possible for the Company to raise capital on acceptable terms or at all.

Mineral Creek Property

During 2022, Theia acquired a 100% interest in the Mineral Creek Property in consideration of the issuance of 1,365,220 common shares valued at \$2,047,830. The Mineral Creek Property is located 12 kilometers southeast of Port Alberni, on Vancouver Island, British Columbia.

The vendor of the Mineral Creek Property retained a 1.0% Net Smelter Returns (“NSR”) royalty.

As of March 31, 2026, Karus had a reclamation bond of \$16,715 (December 31; 2025 - \$16,715) on its Mineral Creek Property.

South Cariboo Property

The Company holds a collection of claims in British Columbia comprising the South Cariboo property, which includes the ‘FG Gold Project’ and the ‘Gold Creek Project’, located in the Cariboo Mining Division, British Columbia, Canada.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

Other Claims

As part of the land holdings in the South Cariboo Property, during the year ended December 31, 2024, the Company acquired two greenfield gold exploration projects named Hawk and TEP claims in consideration of cash payment of \$50,000.

The TEP claims carry a future potential bonus payment for the Company of \$1.50 per ounce of gold or gold equivalent identified as inferred, indicated, or measured in a NI 43-101 report. The TEP claims include a 2% NSR, of which one-half can be repurchased at any time prior to commercial production for \$500,000.

The Hawk claims include a 1% NSR, of which one-half can be repurchased at any time prior to commercial production for \$500,000.

6. LOAN PAYABLE AND DERIVATIVE LIABILITY

During the year ended December 31, 2025, the Company received a loan from a related party (Note 8) in the amount of \$120,000 bearing interest at an annual rate of 15%, compounded monthly and was repayable in full upon the earlier of (i) five business days following the Company having raised at least \$1,500,000 in an equity financing or (ii) March 8, 2026. The lender secured the option to convert the outstanding principal and accrued interest to units in the capital of the Company at the issue price that is lesser of (i) \$0.75 per unit or (ii) such price per share offered pursuant to the private placement on or before the maturity date. Each unit issued consists of one common share and one-half common share purchase warrant exercisable at the private placement issue price per share plus 30% for three years from the date of grant. If the private placement proceeds as an offering of units, the lender has the option to convert the principal and accrued interest to units at a price per unit that is 15% discounted from the private placement unit issue price.

For accounting purposes, because the terms of the loan provided the lender the option to accept the Company's shares for settlement and did not require delivery of a fixed number of the Company's shares upon settlement, the loan was separated into a financial liability and a derivative liability component. The fair value of the derivative liability component at the time of issuance was calculated using the Black-Scholes option pricing model with the following inputs: share price of \$0.85, expected dividend yield of 0%, expected volatility of 100%, risk-free interest rate of 2.61%, and an expected life of 0.18 years. The fair value of the liability component was determined at the time of issuance as the difference between the face value of the convertible debentures and the fair value of the derivative liability component.

On January 29, 2026, the terms of the loan agreement was amended to include an additional consideration of 25,479 bonus units of the Company. Each unit consist of one common share and one-half common share purchase warrant exercisable at \$1.15 for two years from the date of issue.

On February 2, 2026, the lender exercised the conversion feature of the loan to fully settle the outstanding balance, which resulted in the issuance of 169,861 units, inclusive of the 25,479 bonus units (Note 7).

During the period ended March 31, 2026, the Company recorded accretion and interest of \$25,218, which includes \$21,657 for the 25,479 bonus units granted.

7. SHARE CAPITAL**Authorized**

Unlimited number of common shares with no par value.

Issued and Outstanding

During the period ended March 31, 2026, the Company:

- i) issued 8,886,604 units at a price of \$0.85 per unit pursuant to a private placement for aggregate gross proceeds of \$7,553,614. Each unit consists of one share and one half share purchase warrant, where each whole warrant entitles the holder to acquire an additional share of the Company at a price of \$1.15 for a period of 24 months. The Company incurred cash issuance costs of \$697,435, and also issued 622,062 broker warrants valued at \$281,500. Each broker warrant will entitle the holder to acquire an additional share at an exercise price of \$0.85 for a period of 24 months.
- ii) issued 169,861 common shares valued at \$144,382 to settle an outstanding loan payable (Note 6).
- iii) issued 258,109 common shares valued at \$219,392 to initial investors pursuant to the early investor anti-dilution rights (see below).
- iv) issued 170,000 common shares valued at \$229,500 pursuant to the exercise of RSUs.
- v) issued 177,928 common shares valued at \$151,239 pursuant to the Yamana Gold's top up provisions (see below).

The Company has an arrangement with Yamana Gold Inc. ("Yamana", a subsidiary of Pan American Silver Corp) whereby Yamana has rights to maintain a pro rata ownership interest of 1.89% in the Company on an undiluted basis at no additional cost to Yamana until the date the Company's common shares are listed on a recognized stock exchange in Canada. As a result of these top-up provisions, the Company issued 51,747 shares valued at \$69,858 to Yamana. If such listing of the Company's shares did not occur by December 31, 2024, Yamana's shareholding interest is to be topped up to 6.30% on an undiluted basis. As a result, during the year ended December 31, 2025, the Company issued 1,551,838 common shares valued at \$2,094,981.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

The Company also has an arrangement with its initial investors whereby certain initial shareholders of the Company have anti-dilution rights (“Anti-Dilution Rights”) whereby the Company will automatically issue additional common shares should the Company, provided it is not listed and trading on a stock exchange, issues common shares at a price less than \$0.55 per common share (“Lower Per Share Price”). The number of shares to be issued will equal the difference between the investment divided by the Lower Per Share Price and the number of shares originally issued at \$0.55. As of December 31, 2025, the Company is obligated to issue 131,850 common shares, which is valued at \$177,998. During the period ended March 31, 2026, the Company fulfilled its obligation by issuing 258,109 common shares, which is valued at \$219,393.

Warrants

A summary of the warrants activity for the period ended March 31, 2026 and year ended December 31, 2025, is as follows:

	Number of Warrants	Weighted Average Exercise Price
Warrants outstanding, December 31, 2024 and 2025	-	\$ -
Granted	5,150,294	1.11
Warrants outstanding, March 31, 2026	5,150,294	\$ 1.11

As at March 31, 2026, the following warrants were outstanding and exercisable:

Expiry date	Number of Warrants Outstanding and Exercisable	Exercise Price
January 28, 2028	4,443,302	\$ 1.15
January 28, 2028	622,062	\$ 0.85
February 2, 2028	84,930	\$ 1.15
	5,150,294	

The fair value of the broker’s warrants recorded during the period ended March 31, 2026 was calculated using the Black Scholes option pricing model for total share issuance costs of \$281,500 (2025 – \$Nil). This was based on the following assumptions with no expected dividends or forfeitures:

	Three months ended March 31, 2026	Year ended December 31, 2025
Exercise price	\$1.15	-
Expected life (in years)	2.00	-
Expected volatility	100%	-
Risk-free interest rate	2.51%	-

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

*(Expressed in Canadian dollars unless otherwise stated)***Stock Options**

Pursuant to a rolling stock option plan (the “Option Plan”) for directors, officers, employees, and consultants, the Company may reserve a maximum of 10% of the issued and outstanding common shares, with the exercise price to be determined on the date of issuance of the options. The term of options granted under the Option Plan may not exceed five years and such options vest at terms to be determined by the Board of Directors at the time of the grant.

During the year ended December 31, 2025, the Company:

- i) granted 917,100 stock options valued \$1,018,100 exercisable at \$0.75 through June 30, 2030 to officers, directors, a former director, and consultants.
- ii) granted 173,100 stock options valued \$187,600 exercisable at \$0.90 through June 30, 2030 to directors and a consultant.

The fair value of the stock options recorded during the year ended December 31, 2025 was calculated using the Black Scholes option pricing model for total share-based compensation of \$1,205,700 (2024 – \$Nil). This was based on the following assumptions with no expected dividends or forfeitures:

	Three months ended March 31, 2026	Year ended December 31, 2025
Exercise price	-	\$0.77
Expected life (in years)	-	5.00
Expected volatility	-	100%
Risk-free interest rate	-	2.83%

A summary of options outstanding as follows:

	Number of Options	Weighted Average Exercise Price
Options outstanding, December 31, 2024	100,000	\$ 6.35
Granted	1,090,200	0.77
Options outstanding, December 31, 2025	1,190,200	1.24
Expired	(100,000)	6.35
Options outstanding, March 31, 2026	1,090,200	\$ 0.77

As at March 31, 2026, the following incentive stock options, were outstanding and exercisable:

Expiry date	Number of Options Outstanding	Number of Options Exercisable	Exercise Price
June 30, 2030	917,100	917,100	\$ 0.75
June 30, 2030	173,100	173,100	\$ 0.90
	1,090,200	1,090,200	

Restricted Share Units

Pursuant to a fixed Omnibus Plan (“Omnibus Plan”), the Company may reserve for issuance a maximum of 909,101 common shares as equity-based compensation awards. Together with the 10% rolling stock option plan, only a maximum of 10% of instruments under the Omnibus Plan and Option Plan may be granted to insiders. Awards under the Omnibus Plan may be granted in a form as designated by the Board, including restricted share units, deferred share units, and other performance-based instruments.

KARUS MINING INC.**Notes to the Condensed Interim Consolidated Financial Statements**

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

As at March 31, 2026 the following RSUs were outstanding and exercisable:

Grant date	Number of RSUs outstanding	Number of RSUs exercisable
August 3, 2023	75,000	75,000
December 12, 2023	384,101	384,101
	459,101	459,101

A summary of RSUs outstanding as follows:

	Number of RSUs
Outstanding, December 31, 2024	794,101
Expired	(150,000)
Outstanding, December 31, 2025	644,101
Exercised	(170,000)
Expired	(15,000)
Outstanding, March 31, 2026	459,101

8. RELATED PARTY TRANSACTIONS**Related Party Transactions**

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence decisions. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Key Management Compensation

Key management is comprised of the Company's directors and executive officers. Key management compensation for the period ended March 31, 2026 included:

- i) \$Nil (2025 - \$36,000) to a former CEO for consulting services, including geological consulting services.
- ii) \$62,500 (2025 - \$Nil) to a former CEO for management services.
- iii) \$15,000 (2025 - \$15,000) to a partnership in which the CFO has an interest for accounting services.
- iv) \$30,750 (2025 - \$29,589) to directors of the Company for director fees.
- v) \$Nil (2025 - \$9,699) to a former director of the Company for director fees.
- vi) \$30,000 (2025 - \$30,000) to a former officer who remained as a consultant of the Company for consulting services.

Included in the accounts payable and accrued liabilities as at March 31, 2026, is \$115,290 (December 31, 2025 - \$340,904) owed to the former CEO, directors of the Company, the partnership in which the CFO has an interest in and a former officer who remained as a consultant of the Company. The amounts are unsecured, non-interest bearing and have no specific due date.

The loan payable disclosed in Note 6 is considered a related party transaction. The lender of the loan holds over 10% of the Company's ownership interest, as well as considered to have significant influence over the Company, and is therefore considered a related party.

KARUS MINING INC.

9. FAIR VALUE OF FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are described below.

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair Value of Financial Instruments

The carrying values of cash and equivalents, amounts receivable, reclamation bond, accounts payable and accrued liabilities, and loan payable approximate fair values due to their short-term to maturity nature.

The derivative liability is recognized at fair value using level 2 inputs as the fair value of derivatives was determined using a Black-Scholes option pricing formula.

Financial Risk Management

The main objectives of the Company's risk management processes are to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. The principal risks to which the Company is exposed are described below.

a. Credit Risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and note receivable.

The Company has assessed its exposure to credit risk on its cash and has determined that such risk is minimal. The majority of the Company's cash is held with reputable financial institutions in Canada.

b. Liquidity Risk

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they become due. As at March 31, 2026, the Company had working capital of \$6,458,095 (December 31, 2025 – deficiency of \$291,096). The Company is an exploration stage entity and as a result, does not yet generate any revenue. The Company will seek additional financing through debt or equity offerings, but there can be no assurance that such financing will be available, or on terms that are favourable or acceptable to the Company. The Company's approach to managing liquidity risk is to endeavor to ensure that it will have sufficient liquidity to meet liabilities when they fall due. The Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

c. Interest Rate Risk

Interest rate risk arises from the effect of changes in prevailing interest rates on the Company's financial instruments. The Company holds its cash on which it earns variable rates of interest and may therefore be subject to a certain amount of risk, though this risk is considered by management to be immaterial.

d. Foreign Currency Risk

As at March 31, 2026, the Company did not have any material monetary items denominated in foreign currencies.

KARUS MINING INC.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2026 and 2025

(Unaudited – Prepared by Management)

(Expressed in Canadian dollars unless otherwise stated)

10. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the acquisition, exploration, and development of exploration and evaluation properties in Canada.

11. DEBT SETTLEMENT

During the period ended March 31, 2025, the Company settled outstanding payables of \$338,679 with an arm's length vendor in consideration of a cash payment of \$100,000, which resulted in a gain of \$238,679.

12. LETTER AGREEMENT

Pursuant to a letter agreement ("Letter Agreement") entered into August 2023 between Theia and a related party of Theia contemplating the proposed provision of advisory services by such former related party to the Company following the completion of the Theia Transaction, subject to the Company agreeing to enter into of a definitive advisory agreement with such party, the Company may be required to issue 525,000 shares upon listing its shares on any stock exchange in Canada. Additionally, as compensation for advisory services provided thereafter, the Company may be required to issue up to an additional 1,260,000 common shares upon achieving certain market capitalization and confirming certain mineral resources milestones (collectively "Milestone Compensation"). The Letter Agreement provides that Milestone Compensation could be accelerated should there be a sale of all or substantially all of the shares of the Company or a sale of the South Cariboo property. The Letter Agreement also provides that the payment of Milestone Compensation is subject to shareholder and Canadian stock exchange approval, if required.

To date, the Company has not listed its shares on a Canadian stock exchange. Accordingly, no expense has been recorded in the financial statements.

13. SUBSEQUENT EVENT

Subsequent to March 31, 2026, the Company granted 2,000,000 stock options to directors, officers and consultants exercisable at \$0.85 for 5 years vesting as to one-third (1/3) on June 11, 2026, one-third (1/3) on June 11, 2027 and one-third (1/3) on June 11, 2028.
